

Rabat Project ■

Rabat Project

About the project

— Rabat Project

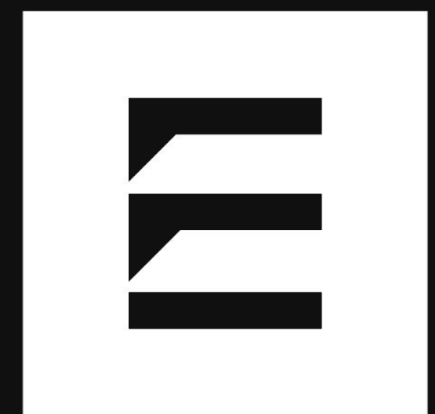

This small residential development is situated in Rabat, one of the most sought after localities of the island.

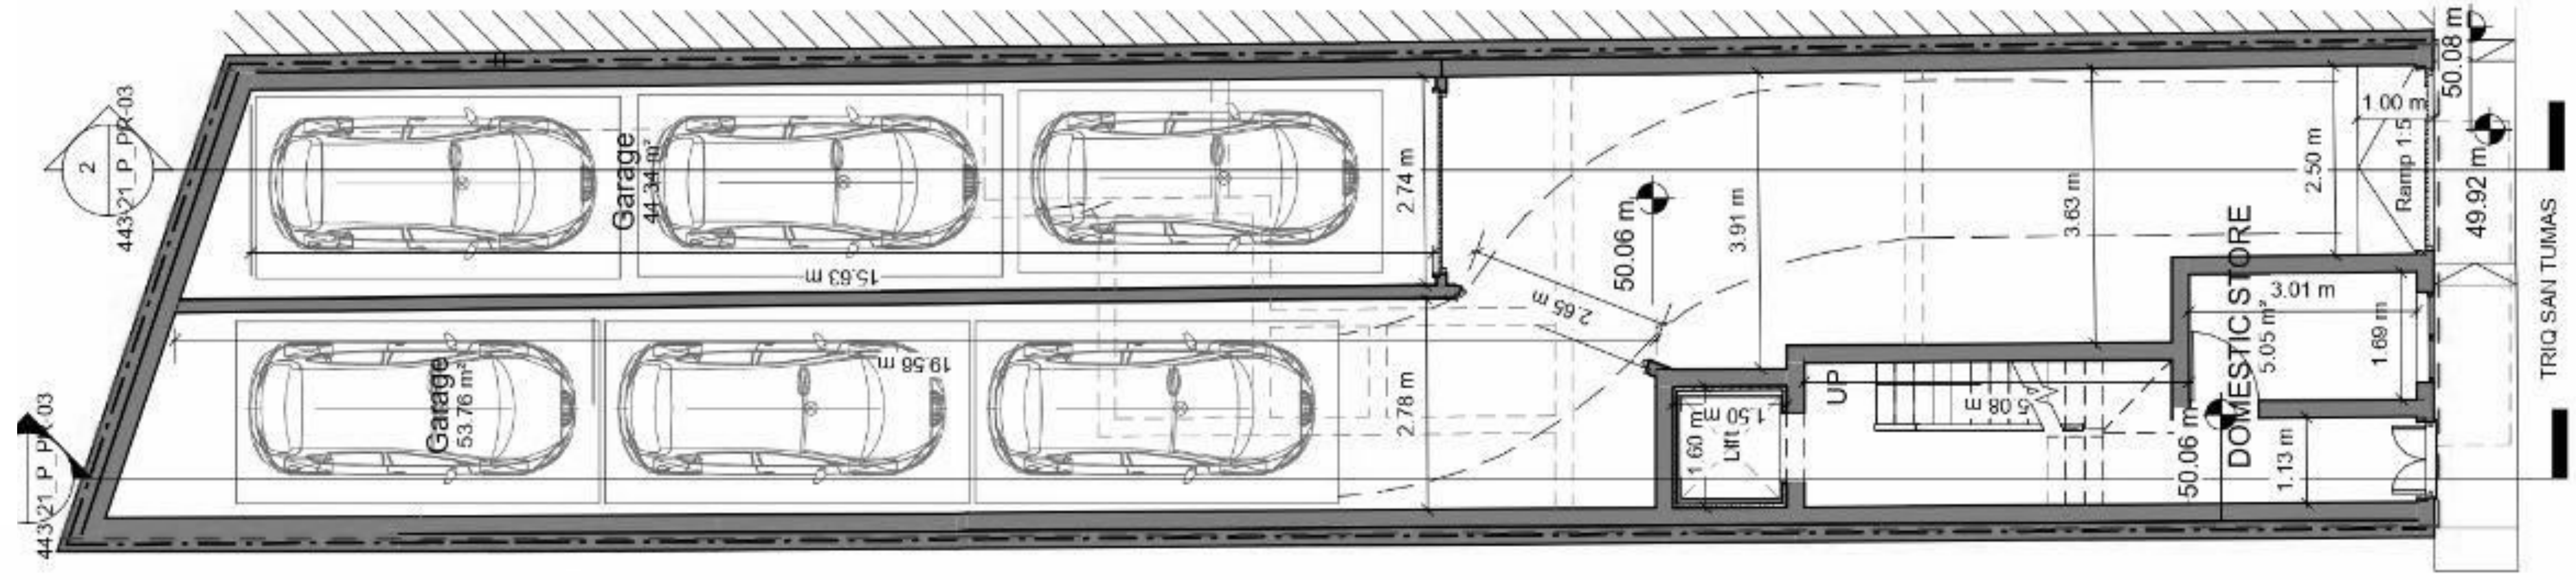

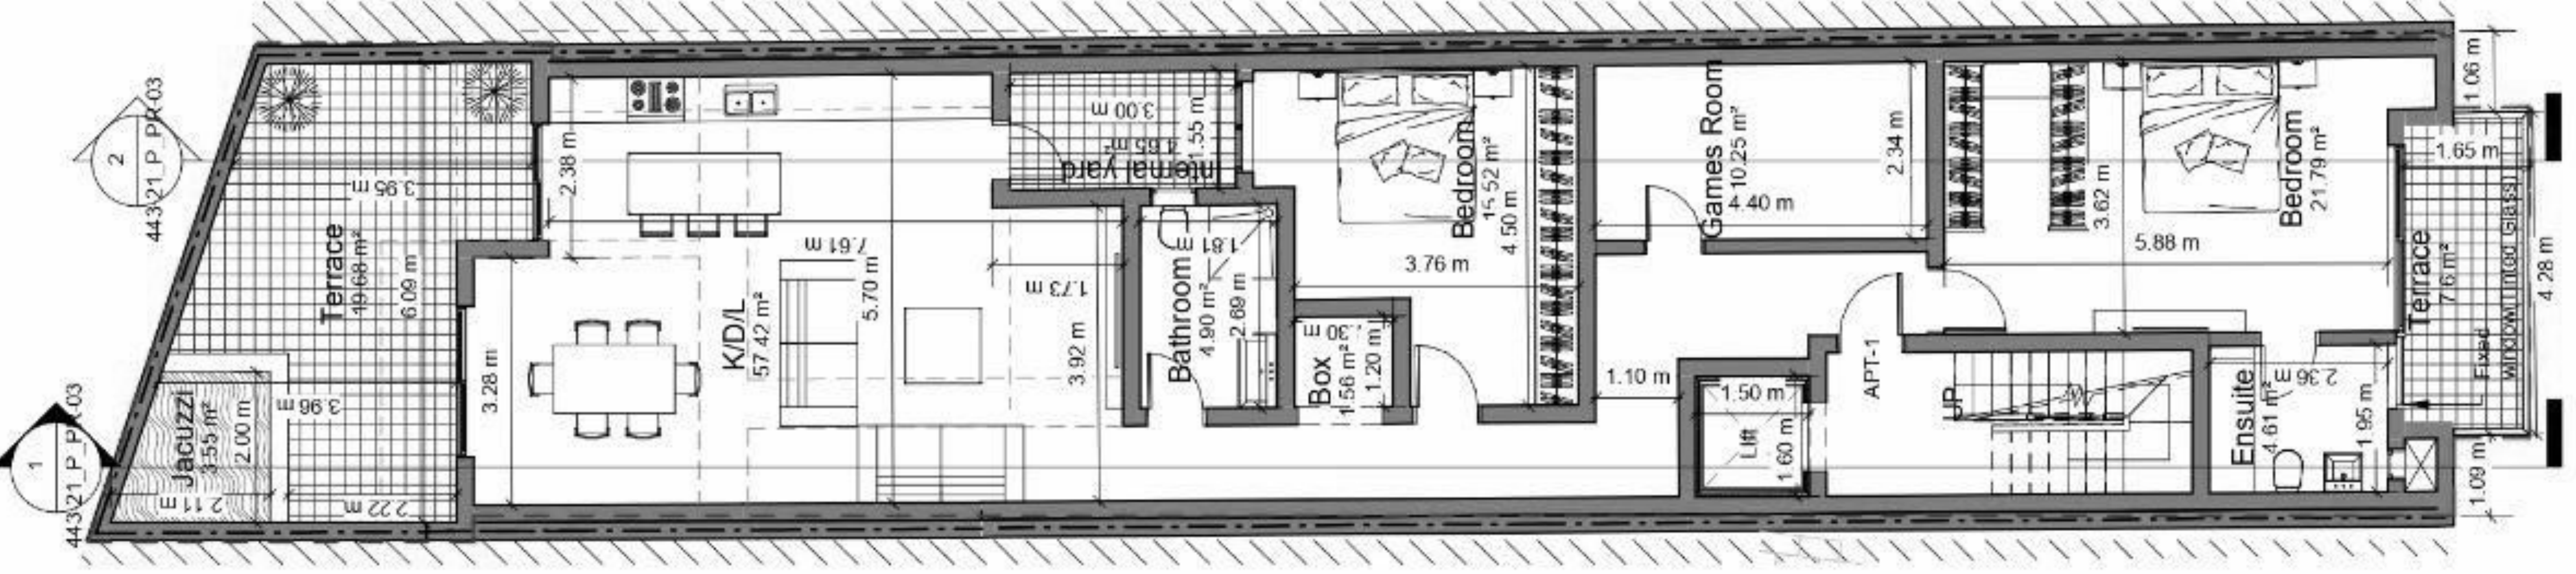

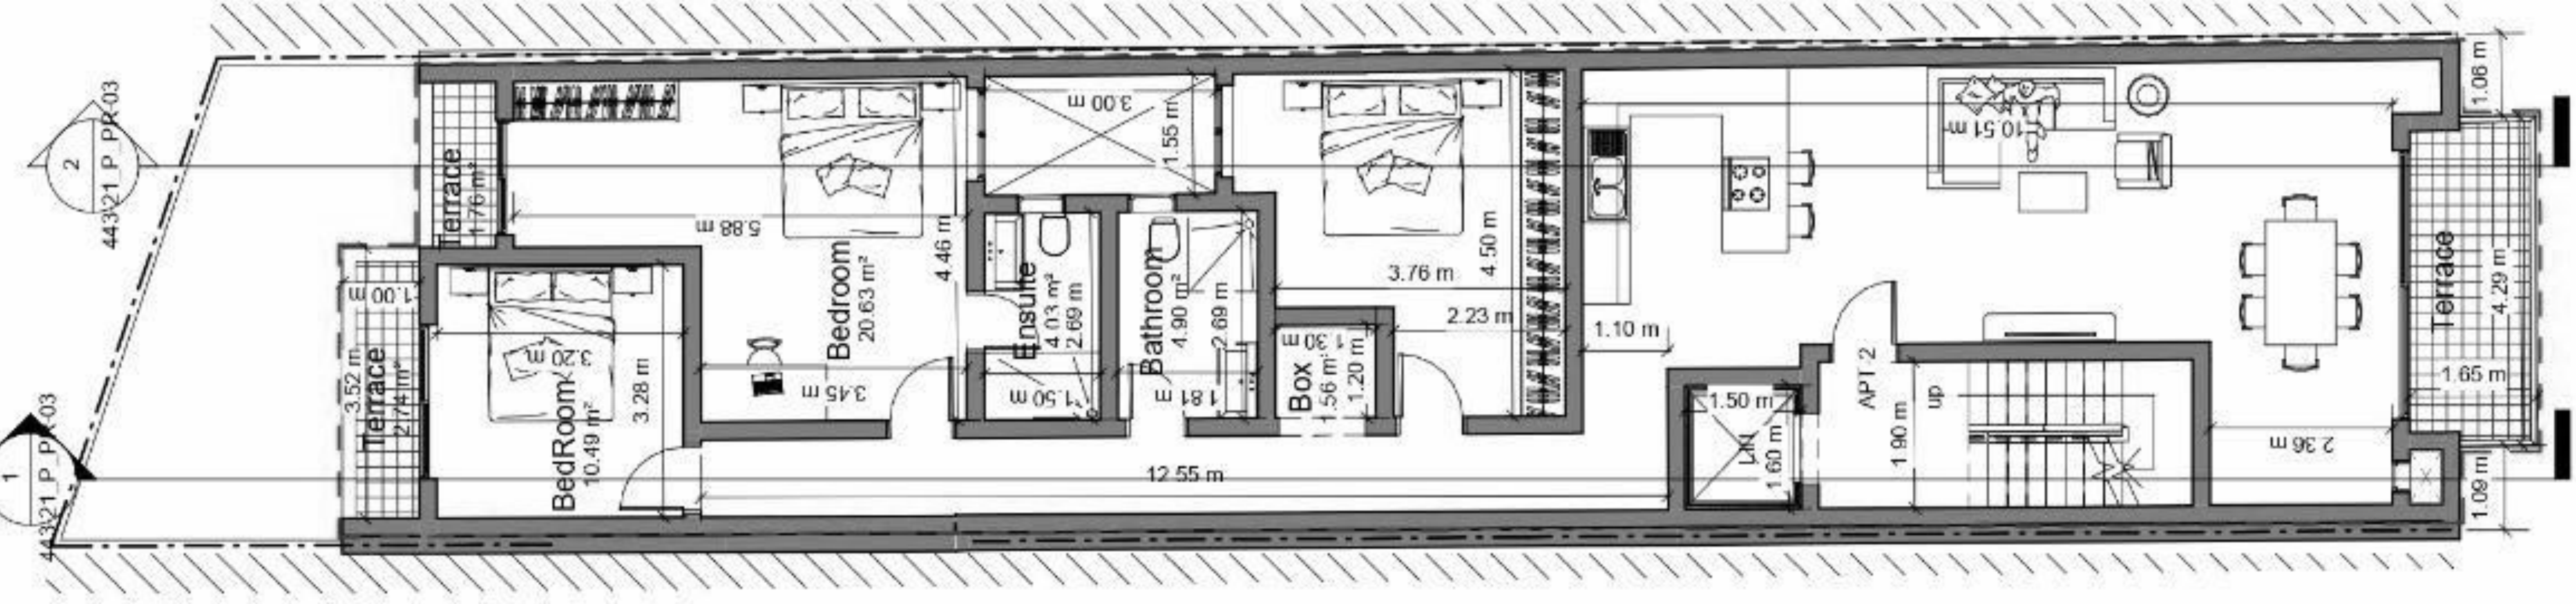

The project will consist of three apartments and a penthouse with a roof terrace which also includes a pool. In total the project will consist of four residential units and street level garages.

The **site location is marked** in the image above. As seen in the image, the block is to be built in a quiet area of Rabat which is still close to most amenities one can wish for.
